

Python code with tab indentation:

```
def hello(name):  
    msg = 'Hello, ' + name  
    return msg
```

```
def add(a, b):  
    if a > 0:  
        return a + b  
    else:  
        return b
```

```
print(hello('world'))
```
